

Updating the Physical Master Plan

Just as NC State campus is bustling at the peak of the current construction activity, master planning for the next campus building boom is underway. Throughout the fall semester, there will be master plan workshops scheduled to assess development in the five campus precincts. Revisions and updates to the Physical Master Plan will be the product of this effort from the precinct workshops.

Each campus Precinct Workshop will be an open forum for discussion about development and growth at NC State led by the Office of the University Architect. University faculty, staff, students and the community are invited to participate. The workshop participants will modify or reconfirm the vision each precinct. Following the workshops, task force teams will incorporate this information into the planning for future projects.

The Physical Master Plan update will be a broad-based activity with participation from the campus and community at large. The Physical Environment Committee and the Campus Design Review Panel will review proposed changes and additions. Presentations to the faculty, staff and student senates will follow. Ultimately, the Board of Trustees is responsible for the

adoption of the Physical Master Plan revisions and updates.

The current NC State Physical Master Plan, *A Campus of Neighborhood and Paths* can be found at www.ncsu.edu/facilities/univ-arch/1-physical.htm.

Master Plan Workshop Schedule

Centennial Precinct Workshop

Engineering Building I, Room 1010
September 9, 2005, 1:30 pm

North Precinct Workshop

Fox Science Teaching Lab, Room 104
September 26, 2005, 1:30 pm

South Precinct Workshop

McKimmon Center
October 10, 2005, 1:30 pm

West Precinct Workshop

CVM Research Building
1st Floor Conference Room
November 3, 2005, 1:30 pm

Central Precinct Workshop

Administrative Services III
Room 124 A & B
November 30, 2005, 1:30 pm
